The ArmourColor® Rusteel® finish offers an authentic rusted iron or patina effect, creating an aged, weather-beaten, metal surface.

This time-worn finish similar to weathering (or Corten) steel is created from a water-based paint with metal particles which naturally tarnish when activated.

A sealer coat is used once the desired effect is achieved and provides a further protective layer.

ArmourColor® Rusteel® is available in four basic finishes, with a range of creative design options available. As a result of the oxidation process, natural variation in finish and final colour can be expected.
